

What is Crananidin™?

Crananidin is a cranberry extract supplement that supports urinary tract health in dogs.

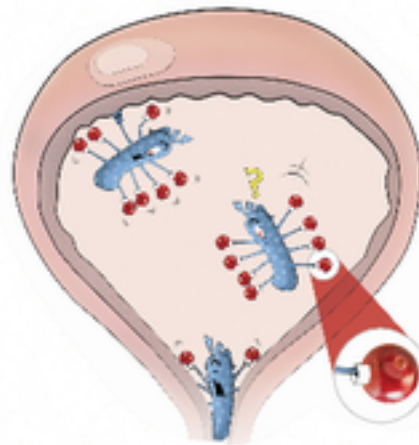

It contains bioactive proanthocyanidins (PACs.)

PACs function to inhibit the adhesion of certain bacteria to the bladder wall, thus supporting urinary tract health.

Adhesion of bacteria:

Crananidin reduces bacteria:

Administration of **CRANANIDIN** minimizes adhesion of the *E. coli* fimbriae to the bladder epithelium (wall) thus allowing bacteria to pass in urine.
